

Melbourne Main Sewer Replacement

Information Bulletin

8 October 2008

Dear Resident or Business Owner,

Out of hours truck movement

Further to our letter of 12 September 2008, John Holland would like to advise of an out of hours truck movement from Fennell Reserve during the early hours of Saturday 11 October 2008.

Piling of the Fennell Reserve shaft is now complete, and the piling rig used to complete this work will be moved from the site.

The piling rig will be removed after 6pm, in accordance with VicRoads policy of transporting wide load vehicles outside peak hour periods.

The truck transporting the piling rig will be loaded during standard working hours, and will depart the Fennell Reserve site via Normanby Road and Boundary Street between the hours of midnight and 3am.

All efforts will be made to minimise noise during the removal, however some noise may be experienced.

John Holland thanks you for your understanding.

If you have any queries or would like more information, please do not hesitate to contact us on the 24 hour toll free community line or via email.

Yours Sincerely,

Melanie Beveridge
