

# Mordialloc Main Sewer Rehabilitation

## Night works from Sunday 13 April 2025

Melbourne Water is committed to maintaining our world-class sewerage system in your local area. We are upgrading sections of the Mordialloc Main Sewer from Chute Street to Malcolm Road, along White Street, from **Sunday 13 April to late September**.

### What we're doing

We're preparing to upgrade the inside of the sewer pipe in your area. To minimise disruption, our crews will be working overnight using a "trenchless" technique that avoids digging up roads and keeps traffic flowing during the day.

Access to the sewer will be through existing maintenance holes, which will become temporary overnight work zones. For safety, we will temporarily stop the sewer flow while we're working. Work areas will be returned to normal during the day to minimise any inconvenience.

### When to expect us

Works commence in early April and are expected to be completed by late September. These works will be scheduled from **7pm to 5am, Sunday to Thursday** when traffic and sewer flows are at their lowest. As we progress, we will keep you informed prior to works taking place directly outside your property.

Dates and times are subject to change due to weather conditions and fluctuating sewer flows.

### What to expect (night time only)

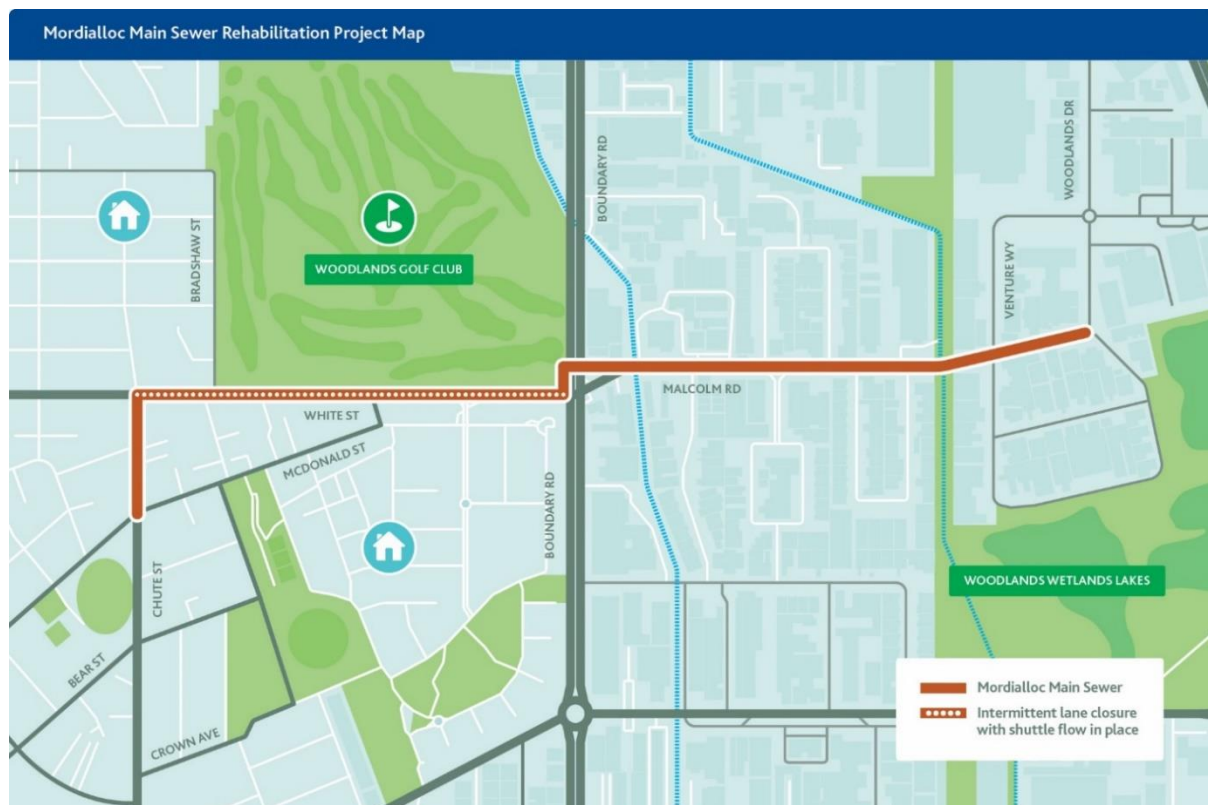

- **Traffic management** will be present to assist motorists, bike riders and pedestrians around our temporary work sites. Please allow extra time when travelling through the area.
- **Noise** will be generated from the relining equipment. We will implement noise reducing methods, where possible, to minimise disruption to the community.
- **Bright lights** will be used during night works. Where it is possible, lights will be directed away from neighbouring properties.

- **Some odour** will be present when opening and accessing the maintenance holes. While working close to your property, we recommend closing your doors and windows. Although this odour may be noticeable at times, it is harmless and will disappear once the works are complete.
- **Flow management** will be set up at nearby maintenance holes to assist with works. This may include the use of a sucker truck to reduce sewage flows.

We understand that these works can be disruptive, and we appreciate your patience while these essential works are carried out.

There will be no interruption to your water or sewerage services during our works. If you experience any issues, **please contact South East Water on 13 18 15.**

## Location of works

### Keep up to date with what's happening

For more information about this project or our other activities please call on 1800 635 817 or email [Mordiallocmain.Project@melbournewater.com.au](mailto:Mordiallocmain.Project@melbournewater.com.au)

Interpreter

For an interpreter, please call the Translating and Interpreting Service (TIS National) on 13 14 50
