

Ryans Road Retarding Basin

Project update

March 2018

Melbourne Water will be continuing investigation works at Ryans Road retarding basin in Diamond Creek as part of the safety upgrade project.

Update

Further investigation within the road reserve is required, these works will begin in the week of **Monday 19 March 2018**, weather permitting.

These investigation works are to identify the underground services in your local area.

Timing of works

Work will be undertaken from 7am to 6pm Monday to Friday and 7am to 1pm Saturday, if required.

What is happening?

Aqua Metro Services is delivering these works on behalf of Melbourne Water.

Work will be undertaken primarily within the road reserve on the downstream side of the retarding basin. The upgrade involves:

- Grass cutting
- Vehicles and trucks accessing the road reserve to identify the location of the underground services
- Minor excavation works may be required, depending on the depth of the underground services
- Staff on site.

Location and access

The Ryans Road retarding basin is located in the road reserve on the downstream side of the basin, off Ryans Road, and in between Juane Park Drive and Ryans Road.

We'll continue to work with local residents and other users of the basin to inform them of the works schedule and any associated impacts that may take place.

The final design for this project will identify the exact works required to complete the safety upgrade. This retarding basin is still undergoing a review, and you will be provided with more information once a final project design is complete and construction works are scheduled.
