Melbourne Water is providing our indicative assets information and not to be used as the basis of future design and expects that the proposed engineering consultant will perform their own calculations as part of requirements for their development.

Please note that as schemes develop and Melbourne Water receives additional information, the corresponding advice available been provided as part of the feasibility request may become out of date. Under the SA process it is the responsibility of the consultant to ensure that Melbourne Water's feasibility advice is current and to certify that all information already provided to Melbourne Water for acceptance is correct having completed their own detailed catchment analysis.
